

## LatourScope

The *LatourScope* is a folding origami map kit based on the work of Bruno Latour on critical zones; the zones that sustain life.

What else counts as a critical zone?

I've inserted a map of indie maunufacturing, a map of not quite business as usual. When you've made it look up the url hidden *inside*

Cut away the origami instructions and follow them carefully. Once you have completed the classic origami 'ball' or 'lantern' you will need to gently blow into the tiny hole at the end to inflate the shape.

You should keep the printed map elements on the inside. When complete flatten it slightly and cut away the round centre, this is where you peer inside to see the map

## Key

*Dark Blue* - Manufacturing services & trade counters

*Light Blue* - Makerspaces and Fablabs
